

ComicCraft

Phase 8 – Project Demonstration

1. Demonstration Objective

The demonstration explains the ComicCraft project, its purpose, main features, working process and final output.

2. Demo Introduction

Start the demonstration by stating the project name: ComicCraft – AI-Based Comic Story Generator.

3. Problem and Purpose

Explain that creating a comic story manually can require planning for characters, dialogue and scenes. ComicCraft provides a simpler web-based approach for developing comic story ideas.

4. Demonstration Steps

- Open the live ComicCraft website.
- Explain the main interface.
- Enter a sample story prompt.
- Enter or select character and setting details.
- Choose tone and art style.
- Click Generate Comic.
- Show and explain the generated output.

5. Demo Video Requirements

- Record the screen while demonstrating the project.
- Provide voice-over explaining the project.
- Mention the project name and purpose.
- Explain the benefits and working process.
- Show the final output clearly.

6. Final Output

The final demonstration should show the working ComicCraft interface and the generated comic-style story result.

7. Expected Result

A clear project demonstration that allows viewers to understand the ComicCraft application, its purpose, workflow and final output.
