

ComicCraft

Phase 1 – Brainstorming & Ideation

1. Project Title

ComicCraft – AI-Based Comic Story Generator

2. Problem Statement

Creating a comic story manually can take considerable time and requires planning for the story, characters, dialogue, and scenes. Beginners may find it difficult to convert a simple idea into a structured comic story.

3. Project Idea

ComicCraft is a web-based project designed to help users create comic-style stories from their ideas. The project provides a simple interface where users can enter a story idea and generate a comic story concept.

4. Target Users

- Students and beginners learning creative storytelling
- Comic and story enthusiasts
- Users who want to quickly develop comic story ideas

5. Proposed Solution

ComicCraft provides an easy-to-use interface for generating and presenting comic story content. It aims to reduce the effort required to plan a comic and make the creative process simpler for users.

6. Key Features

- Simple and user-friendly interface
- Comic story generation/presentation
- Easy input of story ideas
- Clear display of the generated output
- Web-based access

7. Expected Outcome

The expected outcome is a functional web application that helps users create comic story ideas more easily and presents the result in a simple comic-oriented format.
